On

We've been collaborating with Mykola to perform QA operations on our recent emerging solutions. It's been a pleasure working with this person, as he indeed stands out with being able to analyze the product thoroughly as a tester, developer, and the target user at the same time.

Mykola makes a valuable addition to our business partnership to help us to be able to deliver the best software quality possible.

I can definitely recommend Mykola for the future QA and Dev-related endavours and will continue on to considering him as a great specialist.
