Mykola joined us for a 2-hour software testing session on our MVP and did an incredible job. He dissected the product into parts, tested thoroughly, and delivered both a Test Suite Report and a Bug Suite Report that were clear, structured, and useful. Thanks to his work, we were able to catch critical issues and prepare for our next release with confidence.

On top of his skills, he was very professional, reliable, and friendly throughout the process. I'd recommend Mykola to any team looking for a skilled and trustworthy software tester.
